Read this text file before installing Ystation of DS-XG.

The YSTATION consists of CD, MIDI, and WAVE players.
This installer also installs XG format midi files.
If your sound device is DS-1 and using MMX CPU, Sondius-XG
midi files are also installed.

You can show below message on the screen when installing by
customizeing "setup.inf",

" Sondius-XG MIDI requires PentiumII 233MHz or higher.
  Do you wish to install Sondius-XG MIDI files? "

          sondiusMsg=No   : Do not show this message.(Default)
          sondiusMsg=Yes : Show this message.

DOS utility is also installed on
"restart the computer in MS-ODS mode".

You can customize the default of "setupds.exe"
by editing "ds.ini'.

"setupds.exe" supoorts INTEL PIIX4, PIIX3 and ALI Aladdin4
as chipset that supports DDMA and PC/PCI.
